1 Introduction

This document states the vision for a booking website and mobile app that delivers self-service appointments, an admin dashboard, email confirmations/updates, a Portfolio & Testimonials gallery with consent logging, and a Blog. It guides scope, design, and delivery.

1.1 Purpose

Create a shared understanding of business goals, users, scope, and constraints so the solution aligns with the client's needs and can be operated independently after handover.

1.2 Scope

MVP includes: public booking, admin calendar & service management, email notifications (create/reschedule/cancel), Portfolio & Testimonials with consent/approval, Blog, and brand application across the website and mobile app.

Core pages: Home, Services, About, Contact, Blog, Portfolio.

Mobile app mirrors the client-facing flows (browse content, book, reschedule/cancel).

Core Functionalities

1. Booking & Email Notifications (web & mobile) — Show only valid slots; email confirmations/updates.
2. Admin Calendar & Service Management — Day/week views; booking CRUD; service/duration/hours/blackout configuration.
3. Content & Trust Layer — Portfolio & Testimonials (consent + approval) and Blog (cover image, categories/tags, SEO).

1.2.1 In Scope

- Public booking flow via website and mobile app (service -> date/time -> client details -> confirmation).
- Transactional email on create/reschedule/cancel to client and owner.
- Admin dashboard (calendar, booking CRUD, service & hours settings, blackout dates).
- Portfolio & Testimonials (photo upload/management; client name + quote; admin approval; consent capture/registry) accessible on website and mobile app.
- Blog (create/edit/publish; cover image; categories/tags; basic SEO; list/detail) accessible on website and mobile app.
- Branding (logo, palette, typography) applied across web and mobile.

1.2.2 Out of Scope

- Public comments (open commenting/moderation)
- Advanced analytics

1.3 Definitions, Acronyms, and Abbreviations

This section explains all of the terms and abbreviations that are being used in this document, for those who are unfamiliar with them. Not everybody who reads this document will understand all of the terms, so this section is helpful.

Term	Explanation
CRUD	Create, Read, Update, Delete — the basic data actions in the admin
MVP	Minimum Viable Product — first usable release with core features
PII	Personally Identifiable Information — e.g., name, email, phone
SEO	Search Engine Optimization — metadata/settings that help the site appear in search results
SaaS	Software as a Service — third-party subscription tools (e.g., booking platforms)
SSL/TLS	Security protocols that enable HTTPS to encrypt site traffic
UAT	User Acceptance Testing — client verifies the system meets business needs before launch
Slug	URL-friendly identifier for a page/post (e.g., /how-to-book)
Consent log	Stored record proving a client authorized publishing their photo/testimonial

1.4 References

Reference File Name	Version	Description
Project Summary	1.0	Approved scope, outcomes, deliverables, timeline
High-Level Requirements	0.1	Initial functional/non-functional requirements
Personas	0.1	3–5 personas describing target users
User Stories	0.1	3–5 stories per persona

This section also contains links to all other places that were referred to in this document. These may include:

- *Web sites*
- *URLs or network locations*
- *Research done for similar products*

2 Positioning

2.1 Business Opportunity

Replacing DM/phone scheduling with a self-service booking experience and adding Portfolio/Testimonials plus a Blog increases trust and discoverability while reducing administrative time and no-shows.

2.2 Problem Statement

The Problem of	manual, ad-hoc scheduling without a centralized calendar or public app/website
affects	the owner (Erick) and clients
the impact of which is	double-bookings, no-shows, wasted time, and low credibility/discoverability
a successful solution would be	a website and mobile app that exposes only available slots, sends email confirmations/updates, provides an owner calendar to manage/reschedule, and showcases work/testimonials and blog content to attract and convert clients

Table 1 Problem Statement

2.3 Product Position Statement

For	Independent hairstylists (single-operator) serving clients in Toronto
Who	need to replace ad-hoc DM/phone scheduling with a reliable self-service booking flow and build credibility online
The BrazWebDes Hairstylist Booking	is a web and mobile application
That	lets clients book only available time slots with email confirmations/updates, while the owner manages calendar/services and showcases work via Portfolio & Testimonials and a Blog—reducing no-shows and admin time
Unlike	manual DM/phone scheduling (and scattered social posts)
Our product	is tailored for a single stylist, with a simple admin dashboard, applied branding, consented testimonials, and email-only notifications—keeping costs low and content under the owner's control

Table 2 Product Position Statement

2.4 SWOT Analysis

<Reference: https://www.businessballs.com/strategy-innovation/swot-analysis/)

Strengths	**Weaknesses**
Focused MVP	owner-supplied content (photos/posts) needed
Email notifications	limited operating budget
strong content layer (Portfolio + Blog) for trust/SEO	
Opportunities	**Threats**
organic traffic via Blog	established booking SaaS
future add-ons (payments, multi-staff)	deliverability/privacy risks
reusable template for similar businesses	stale content risk

3 Stakeholder and User Descriptions

3.1 Stakeholder Summary

Stakeholder Name	Represents	Role
Hairstylist (Owner/Admin) — Erick	Client/business owner	Defines services, durations, hours, pricing; supplies photos/testimonials/blog content; approves branding and published content; manages bookings; UAT and final sign-off
Customer/Clients	Paying customers	Browse services/portfolio/blog; book/reschedule/cancel; receive email confirmations/updates; can submit testimonials with consent; provide feedback
BrazWebDes Delivery Team	Vendor / design & development	Project management; analysis & design; implementation & testing; deployment & handover; documentation and ongoing communication with the owner
Hosting & Email Providers	External infrastructure	Provide hosting/DB/SSL and transactional email; ensure baseline availability, security, and email deliverability within free/low-cost tiers

Table 3 Stakeholder Summary

3.2 User Summary

User Name	Description	Responsibilities	Stakeholder
Visitor / New Client	First-time site visitor looking for a haircut/eyelash service in Toronto	Browse services/portfolio/blog ; check prices & durations; select service and time; enter contact details; confirm booking; receive email confirmation	Customers/Clients

User Name	Description	Responsibilities	Stakeholder
Returning Client	Existing customer who has booked before	Rebook quickly (from email or site or mobile app); reschedule/cancel via link; update contact details; optionally submit a testimonial with consent	Customers/Clients
Owner / Admin (Erick)	Business owner who manages the calendar and content	View day/week schedule; create/reschedule/cancel bookings; configure services/durations/hours/blackouts; approve/publish testimonials & portfolio items with consent; create/edit blog posts; receive booking emails	Hairstylist (Owner/Admin)
Site Maintainer (BrazWebDes)	Delivery team member performing technical upkeep (during project period)	Deploy updates; manage hosting/SSL/env settings; monitor email deliverability; fix defects until handover	BrazWebDes Delivery Team

Table 4 User Summary

4 Stakeholder Requirements

ID	Requirement	Stakeholder
SR-1	Book only available slots	Customers, Owner
SR-2	Email confirmations/updates on create/reschedule/cancel to client & owner	Owner, Customers
SR-3	Daily/weekly schedule views with booking details	Owner
SR-4	Reschedule/cancel with automated emails	Owner
SR-5	Configure services, durations, hours, blackout dates	Owner
SR-6	Maintain basic customer profile/history for quicker rebooking	Owner, Customers
SR-7	Manage Portfolio & Testimonials with admin approval	Owner
SR-8	Capture/store consent for any published photo/testimonial; allow unpublish/removal	Owner
SR-9	Accessible, responsive UI across pages	All
SR-10	Manage Blog content with cover image, categories/tags, and basic SEO fields	Owner

Table 5 Stakeholder Requirements

5 System Features

ID	Feature	Stakeholder Requirement ID
SF-1	Client Booking Flow	SR-1, SR-2
SF-2	Admin Calendar & Booking Management	SR-3, SR-4, SR-5
SF-3	Email Notification Service	SR-2
SF-4	Customer Profile & History (basic)	SR-6
SF-5	Portfolio & Testimonials (consent registry)	SR-7, SR-8
SF-6	Accessibility & Responsive Layout	SR-9
SF-7	Blog Management (posts, tags/categories, SEO, publish states)	SR-10

Table 6 System Features

6 Assumptions

- *Single stylist, single location, one calendar*
- *Notifications are email-only*
- *Owner supplies photos/testimonials/blog content and approves consent text*
- *HTTPS hosting; timezone America/Toronto*
- *Mobile app mirrors client-facing features available on the website*

7 Constraints

- Budget favors free/low-cost tiers (hosting/email)
- Privacy: publish photos/testimonials only with recorded consent; enable takedown on request
- Availability/deliverability of email depends on chosen provider's limits and sender reputation
